

Nirvana Managed Wi-Fi >>

One network, wherever you go.

From your resident's unit, to the rooftop pool deck, to the resident and lounge, fitness center, Nirvana Managed Wi-Fi allows you and your residents to connect to one network and be seamlessly connected throughout the property via wireless access points, while also supporting owner IoT devices and providing vendor connectivity.

Available as a bulk offering, our most robust solution comes with concierge-level support and the highest potential return on NOI.

Nirvana Managed Wi-Fi features:

- Instant on, no service installation required
- Secure resident access to private VLAN network
- No throttling or data caps
- Seamless roaming allows for nonstop Wi-Fi service as your travel from your unit to your amenity spaces to your front lobby without dropping

Owners can connect any IoT, prop tech, or management devices requiring Internet connectivity with Wi-Fi capability via their own private and secure VLAN.

Property wide connectivity enables operational efficiencies- energy, insurance, and labor savings.

Leasing, Maintenance, and Engineering staff can access necessary information and applications everywhere.

Nirvana Managed Wi-Fi will better meet resident needs while enabling Owner monetization.
